S00 / STUDENT WORKSPACE

Start with your own view.

About eight minutes. Work individually with the support agreed with your teacher.

A FICTIONAL LUNCH-QUEUE PROPOSAL

A supplier says its AI lunch-queue sign halves waiting time for every school. On one Tuesday, one queue using the sign averaged 4 minutes; a different queue on Monday averaged 8. Menus and staffing differed. The trial did not measure how many students got lunch. An AI-style summary repeats the claim without naming a source.

WOULD YOU RECOMMEND USING THE SIGN NOW?

Use a case detail to explain your reasoning.

WHAT IS UNCERTAIN, AND WHAT WOULD YOU CHECK NEXT?

Use words, drawing or an oral response as agreed.

WHAT HELP WOULD YOU CHOOSE, AND WHY?

Your own work, a person, another tool, AI help or unsure are possible choices.

S01 / STUDENT WORKSPACE

Solve the problem. Keep the decision yours.

Your final product is a recommendation you can defend.

THE CHALLENGE

The Campus wants to conserve water while keeping its garden healthy. A supplier proposes an AI watering system. Should the Campus adopt it, run a limited test, choose a simpler option or wait? There is no deadline requiring a purchase today.

What to deliver	What to show
A recommendation	State the action, the evidence, a limit, a next check and a responsible role.
An AI contribution report	Show something AI added, a concern you investigated and what you accepted, changed or rejected.
A revision trail	Keep your first view, independent check, revised instruction and explanation of a final edit.

How this paper exercise works

Write your own thinking and brief first. Your teacher then supplies prepared replies. They are fixed examples, not responses generated from your wording. Your job is to question the help and decide what to do with it.

SUCCESS IS UNDERSTANDING YOU CAN EXPLAIN

You may use a person, another tool or no AI. More exchanges or more polished wording do not earn extra credit. Leave out private information.

S02 / STUDENT WORKSPACE

What do you think before receiving help?

Keep this page so you can explain what changed later.

01 / MY FIRST RECOMMENDATION

What would you do now, and why?

02 / A GOOD OUTCOME WOULD MEAN...

Consider the garden, the people affected and what must not be sacrificed.

03 / WHAT I KNOW, ASSUME AND NEED TO FIND OUT

Separate a fact from an assumption. Name one uncertainty.

THINK BEFORE OUTSOURCING

Which part of this problem do you need to understand yourself? Which part could help usefully support?

S03 / STUDENT WORKSPACE

Inspect the original records.

These records are fictional. Trace claims to what was actually observed.

A. GROUNDSKEEPER'S TEST LOG

Campus groundskeeper • fictional local record • 4 May

Two similar beds were observed for two days. The usual schedule used 20 litres; the new system used 10. Only water use was recorded. Plant health and longer-term weather were not measured.

B. SUPPLIER'S POSTER

Sprout Systems • fictional advertisement • 5 May

'Save half your water everywhere!' The poster repeats the Campus test. The supplier sells the system. It gives no additional tests or methods.

C. GROUNDSKEEPER'S CLARIFICATION

Campus groundskeeper • fictional interview note • 6 May

'The result is promising for these beds. I have not tested a heat wave, different plants or a whole growing season. I would not promise the same savings everywhere.'

S04 / STUDENT WORKSPACE

Direct the help without handing over judgment.

Write your own brief. The supplied reply later is a fixed example, not a personalised response.

01 / TASK, AUDIENCE AND MY CURRENT VIEW

What are we deciding, for whom, and what do I already think?

02 / WHAT HELP MAY DO - AND MUST NOT DO

Organise, explain, question, compare or review? What remains my responsibility?

03 / SOURCES, CONSTRAINTS AND OUTPUT

Name the allowed records. Ask for unknowns to be labelled and unsupported facts to be left out.

04 / HOW I WILL CHECK THE RESULT

Which claim or reasoning step will I check independently?

S05 / STUDENT WORKSPACE

Read the contribution before trusting it.

Authored simulations, not live AI. Compare both replies with your brief and the garden records.

A. REPLY TO 'MAKE THE SYSTEM SOUND EXCITING'

Authored simulation • not a live model or evidence

'The AI system guarantees a 50% saving in every garden. Its successful test proves it is ready for the whole school. Buy it now!'

B. REPLY TO 'SEPARATE OBSERVATIONS, LIMITS AND NEXT STEPS'

Authored simulation • not a live model or evidence

'The two-day test used 10 rather than 20 litres. We do not know the result in other conditions. Run a longer comparison and measure plant health. The system costs 30 credits.'

C. SOURCE CHECK

Campus evidence folder • fictional document inventory

The folder contains the two-day log, supplier poster and groundskeeper clarification. None gives a price. The 30-credit price in reply B cannot be verified from these documents.

S06 / STUDENT WORKSPACE

What did AI contribute? What deserves a question?

Use a short quote or an accurate summary. Do not call the reply an independent source.

01 / A USEFUL CONTRIBUTION

What did the reply help you notice, organise or explain?

02 / A STATEMENT I WOULD CHALLENGE

Quote or summarise the detail. What is your concern?

03 / A QUESTION THAT COULD CHANGE THE DECISION

Make it specific: which source, assumption, missing outcome or affected person matters?

04 / MY INDEPENDENT CHECKING PLAN

What will I calculate, inspect or ask a knowledgeable person?

S07 / STUDENT WORKSPACE

Check outside the reply.

Use the garden records and source inventory. A second AI answer alone is not a source check.

01 / THE CLAIM I CHECKED

Write the precise statement, not just the topic.

02 / WHAT I DID AND WHAT I FOUND

Name the record and exact detail, calculation or independent method.

03 / MY JUDGMENT

Supported, needs qualification, not established, or unresolved? Explain why.

04 / WHAT THIS CHANGES

Keep, qualify, remove or investigate? Connect the change to the decision.

S08 / STUDENT WORKSPACE

Consider people as well as performance.

Separate what people value, what they report and what still needs checking.

A. GROUNDSKEEPER'S PRIORITIES

Fictional role card • read aloud or discuss

'I want to conserve water and keep plants healthy. I can supervise a small trial. We need a manual stop and a clear rule for checking dry soil. A person must remain responsible.'

B. STUDENT GARDEN CLUB

Fictional role card • read aloud or discuss

'We want to keep learning how to care for the garden. The controls should work for everyone. We do not agree to upload our names or photos to test the watering system.'

C. SCHOOL PURCHASING LEAD

Fictional role card • read aloud or discuss

'No price has been confirmed. We need the real costs, approval and a comparison with a simpler timer. We can pause the proposal while gathering this information.'

S09 / STUDENT WORKSPACE

Return with better inputs.

Use what you found independently to improve the next request.

01 / THE FINDING THAT CHANGES MY INSTRUCTION

Name the evidence, constraint or missing perspective. Why does it matter?

02 / MY CHALLENGE QUESTION

What should the help reconsider or explain? Avoid asking only for confidence or more polish.

03 / MY REVISED BRIEF

State the new requirements, allowed sources, unknowns and kind of revision needed.

BEFORE YOU INSPECT THE PREPARED REVISION

Predict one improvement and one thing you will still need to judge for yourself. Your brief is practice; the next supplied reply is an authored example.

S10 / STUDENT WORKSPACE

Better does not mean finished.

This fixed revision uses the supplied findings. It is not a new source or a response to your own wording.

PREPARED AI-STYLE REVISION

The supplied two-day comparison recorded 10 rather than 20 litres. That supports describing this small test, not promising the same result everywhere. Plant health and other conditions were not measured; the price is not established by the records. Options include a supervised trial with approval, a simpler timer or waiting for better information. A trial proposal should address water use, plant health, access, privacy and a manual stop. The responsible people must agree the checks and review conditions before acting.

01 / WHAT IMPROVED, AND WHAT SUPPORTS THAT JUDGMENT?

Compare with the earlier reply and your revised requirements.

02 / WHAT WOULD I STILL QUESTION, EDIT OR REJECT?

Consider an option, a missing safeguard, an assumption or an unresolved fact.

03 / WHAT REMAINS A HUMAN DECISION?

Whose permission and responsibility matter? What can this reply not decide for us?

S11 / STUDENT WORKSPACE

Make the work yours.

A justified trial, simpler option or pause can all be defensible. Use extra paper or an oral explanation if needed.

01 / OUR RECOMMENDATION

State an action, a source detail, a limitation, a next check and a responsible role. Distinguish a proposed safeguard from an observed result.

02 / AI CONTRIBUTION AND MY CONSEQUENTIAL EDIT

What did you accept, change or reject? Name one specific change and the reason for it.

03 / REMAINING UNCERTAINTY AND RESPONSIBILITY

What could change your decision? Who must approve, check or stop the action?

S12 / STUDENT WORKSPACE

Use the routine in a different setting.

Read the new records, then complete S13 before feedback or worked answers.

A. TRIAL NOTE

Fictional library log • 12 June

Six volunteers sat at the display for two lunch breaks. They read twice as many pages as a different group the previous week. No comprehension questions were asked. Reading materials and noise levels differed.

B. AI-STYLE SUMMARY

Authored simulation • not independent evidence

'The trial confirms doubled comprehension for all students. Several websites agree.' The summary gives no website titles, links or new measurements.

C. LIBRARIAN'S NOTE

Fictional interview note • 13 June

'Pages read and understanding are different measures. We need a fair comparison and accessible options. Some students prefer a quiet corner without a display. We have not obtained a price or approval.'

S13 / STUDENT WORKSPACE

Solve the new problem with your own reasoning.

Work individually with agreed access support. Preserve this before discussion.

01 / MY INITIAL VIEW

What would you recommend about the display, and why?

02 / THE AI CONTRIBUTION AND MY INDEPENDENT CHECK

What does the summary say? What does a named original record establish? Explain a limit.

03 / MY RECOMMENDATION AND NEXT CHECK

Choose an action, explain the help you would use or decline, and keep a person responsible.

S14 / STUDENT WORKSPACE

Explain the improvement. Keep ownership of the answer.

Only use this page after the first response has been preserved.

01 / FEEDBACK, QUESTION OR NEW CHECK

What did you investigate after your first response? Note any help or substantive hint.

02 / MY REVISION - OR REASON FOR RETAINING MY VIEW

Connect your change or recheck to a source, a need or a reasoning gap.

03 / WHAT I CAN NOW EXPLAIN WITHOUT COPYING AI

What did I understand for myself? When would I use, limit or stop AI help?

TAKE THE ROUTINE WITH YOU

Think first. Direct the help. Report its contribution. Question and check. Iterate for a reason. Make the final decision yours.
